Keywords: social policy, scientific and technical sphere, innovation and innovation development, the mechanism of selforganisation of complex systems in the states of their instability, the synergy, the point of bifurcation, institutional relations, selective and system-wide approach to industrial policy, the system technology of interventions.

Interrelation of motivational function of the wages and consumer's basket in conditions of intellectualization of the labor

S.P. Stanishevskaya, Doctor of Economics, Associate Professor, Department of Economic Theory and Industrial Markets

E-mail: stan@psu.ru

D.A. Gubanov, Doctor of Economics, Senior lecturer, Department of Economic Theory and Industrial Markets

Perm State University, 614990, Perm, Bukireva str.,15

E-mail: dima_gubanov@mail.ru

Research examines contents and tendencies of development of a labour resource in the modern economy conditions. The concept of a category «a rational consumer's basket» is analyzed. On the basis of the received results authors determine the features of the equilibrium model of the individual labor supply which are defined as a factor of development worker's abilities - his education.

Keywords: a rational consumer's basket, motivational function of the wage, worker's equilibrium, intellectualization of the Labor.

Management of the intellectual potential of a region

Zh.A. Mingaleva, Doctor of Economics, Professor, Head of Department of National Economy and Economic Security

I.I. Maksimenko, Senior lecturer, of National Economy and Economic Security Department

Perm State University, 614990, Perm, Bukireva str.,15

E-mail: mingal1@psu.ru

Given article opens concept of a intellectual potential, and also its structure and consisting elements. Article shows an Importance of management by a intellectual potential for region development. There are the basic aspects of management of a intellectual potential of region in this article.

Keywords: intellectual potential, management by a potential, regional aspects of management by a intellectual potential.

Strategic management of foreign-economic activity in the program of structural modernization of economy

Zh.A. Mingaleva, Doctor of Economics, Professor, Head of Department of National Economy and Economic Security

Perm State University, 614990, Perm, Bukireva str.,15

E-mail: mingal1@psu.ru

E.D. Oborina, Senior lecturer, Department of Economics, Business and Management "West-Ural Institute of Economics and Law", 614000, Perm, st. Siberian 35

The aim of the paper is to reveal the main problems of correlation between the foreign-economic activity and structural modernization of regional economy. The special attention is given the foreign-economic activity of the Perm region.

Keywords: foreign-economic activity, management of foreign-economic activity, structure of export, structural modernization of regional economy.

SECTION III. ECONOMIC POLICY

Priority of agrarian transformations abroad and the possibility of its adaptation in Russian practice

U.V. Lysenko, Doctor of Economics, Professor, Head of Department Economic and enterprise management

Russian State Economic University Chelyabinsk Institute (branch), 454010, Chelyabinsk, Ordzhonikidze str., 50

E-mail: SSS3101@yandex.ru

The article covers the development of agro service in the producing of agricultural goods and rations for population. Taking into account the adaptive measures, namely the technical potential will ensure the stable and optimal increase of harmonious using of all factors the agrarian productions.

Keywords: agro technical service, maintenance, special service and supply, technical progress, integral process.

SECTION IV. MATHEMATICAL AND INSTRUMENTAL METHODS OF ECONOMICS

Dynamic modeling of the economic development of the country in the modern conditions

T.P. Danko, Doctor of Economics, Professor of Marketing Department

E.M. Petrikova, Doctor of Economics, Senior lecture, Department of Marketing

S.M. Petrikova, Doctor of Economics, Senior lecture, Department of Marketing

Russian Economic Academy of G.V. Plekhanov, 115998, Moscow, Groom lane str., 36

E-mail: tpdanko@gmail.com

In the present work principal methods existed in economics and mathematics and used in simulation modeling of economic procedures are presented. Economic-mathematical modeling is presented applied to Russian economy. It is indicated how to construct the dynamic model of Russian economic development and how it may be expanded to take into account profound interrelations and interactions which are existed in the economy to present more insightful and accurate information about optimal economic development behavior of the country in the modern conditions. It is analyzed all soft platforms of simulation modeling and applied statistics and it is concluded about further directions of its application and improvement in the system of dynamic modeling.

Keywords: simulation modeling, system dynamics, agential modeling, scenario analysis, optimization analysis.
